

Welcome to Norrenergi

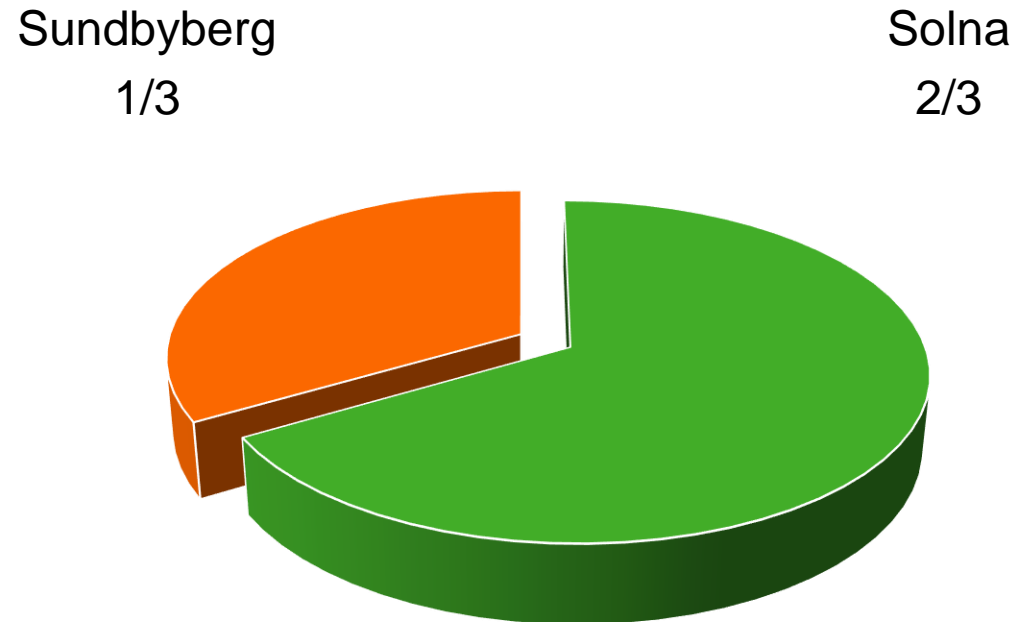

[norrenergi](http://norrenergi.no)

Norrenergi in brief

- *Business scope*
District heating and district cooling
- *Number om employees*
80
- *Yearly production volume*
District heating: 1 TWh
District cooling: 65 GWh
- *Turnover*
800 MSEK

We are close to our customers and owned by the citizens

Our district heating network – 210 km

Our district heating heats...

-
- more than 100 000 people
 - more than 2500 buildings – approx. 1 TWh
 - 90% of all buildings in Solna and Sundbyberg are connected

Our district cooling network – 39 km

Our district cooling provides a comfortable indoor temperature...

- to offices, shopping malls and data centers
- to approx. 120 buildings – about 70 GWh

We set our standards high

- First energy company in Sweden to label all district heating and cooling with the ecolabel, Good Environmental Choice, according to the standards of The Swedish Society for Nature Conservation.
- Energy services to help our customers optimize and minimize their use of energy
- Good environmental performance
- Provide CO₂ neutral district heating in customers choice

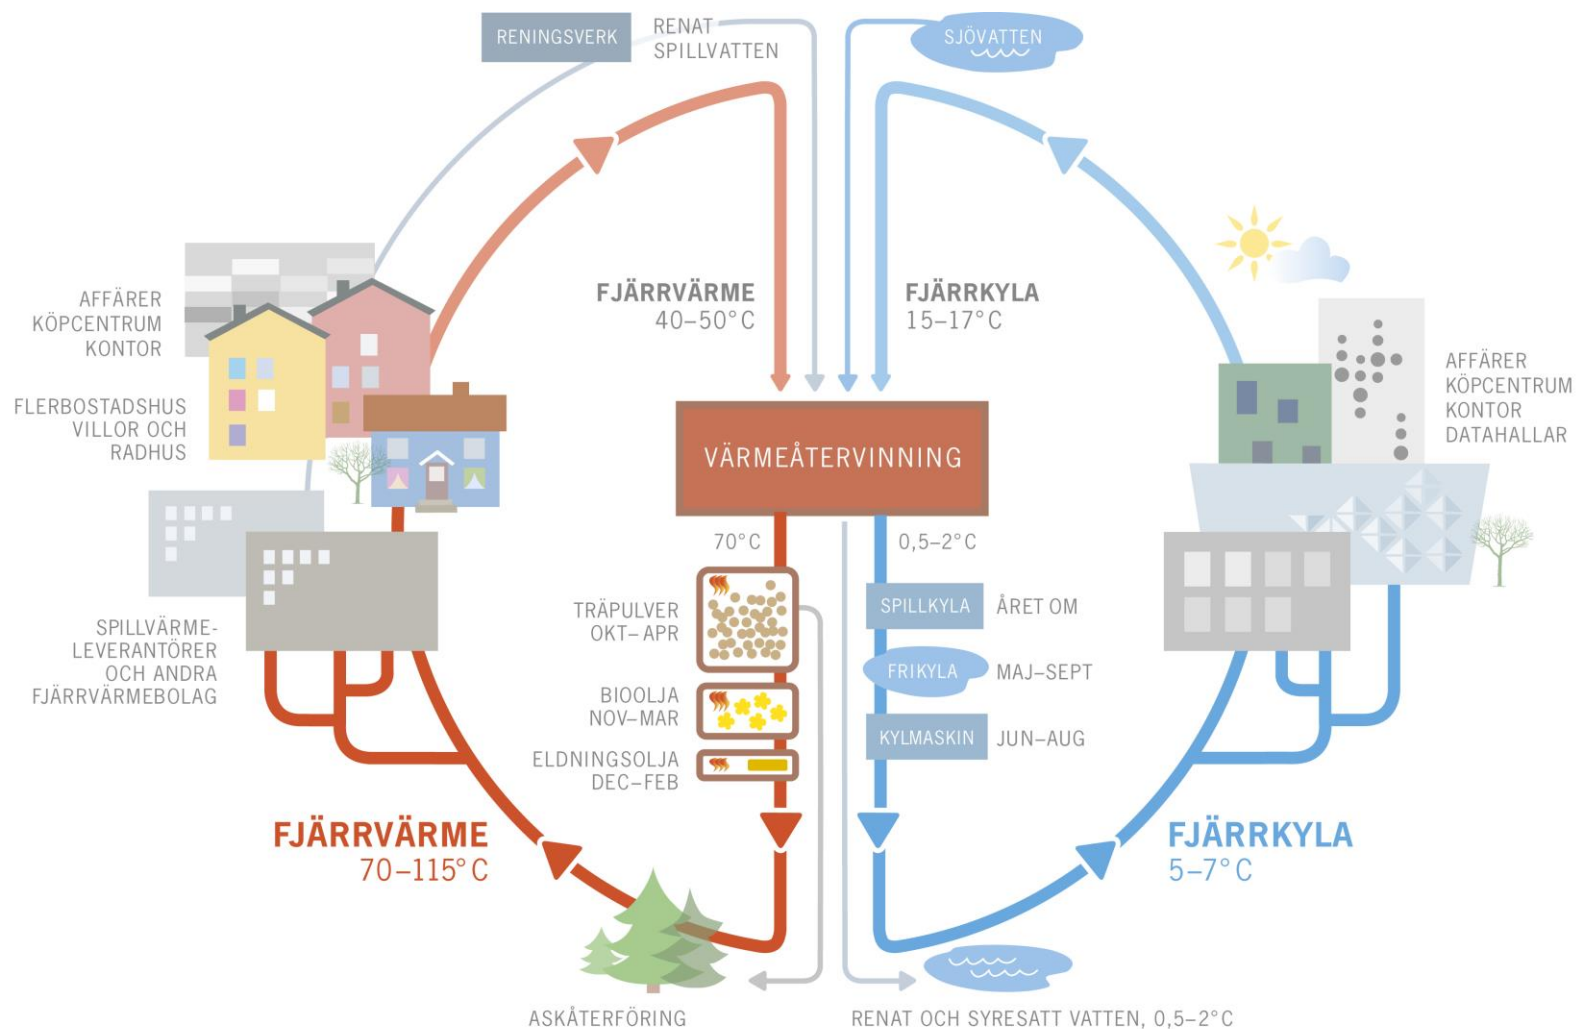

Helping customers to save energy

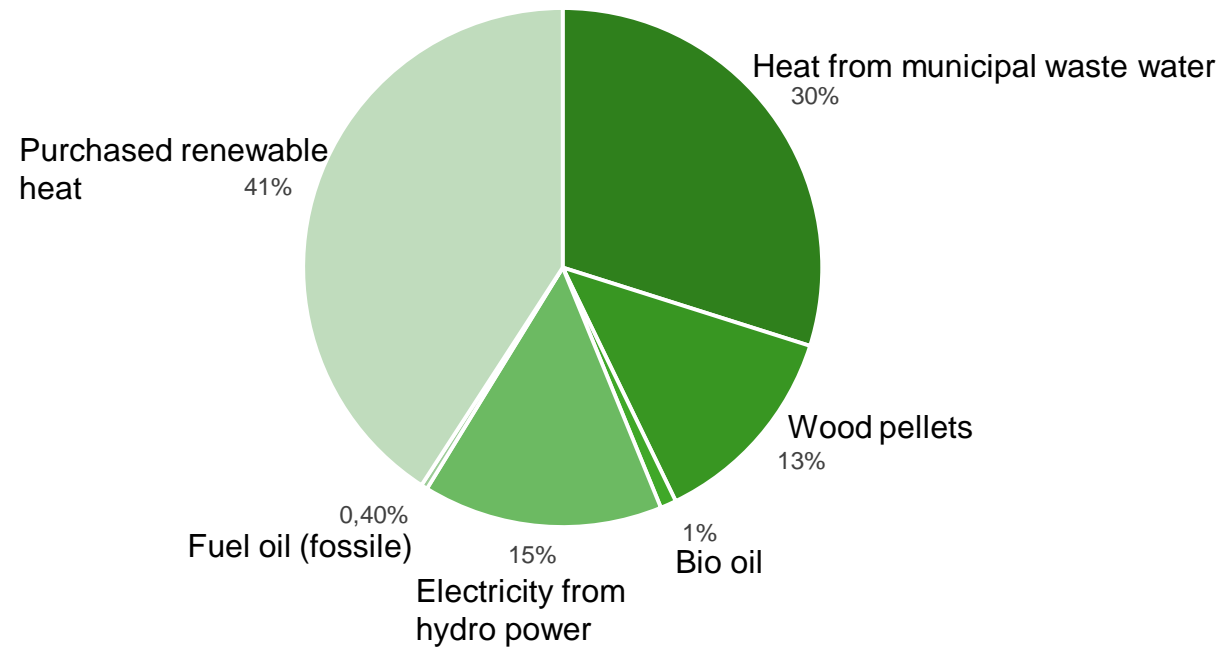

We offer the following energy services to our customers:

- web-based customer service
- yearly review of the substation and heating system

An energy system of smart cycles

99,3 % renewable energy sources

Solnaverket

Boilers P1/P2
Wood pellets
(45 MW)

Boilers P4 Wood
pellets and
tallbeckolja
(65 MW)

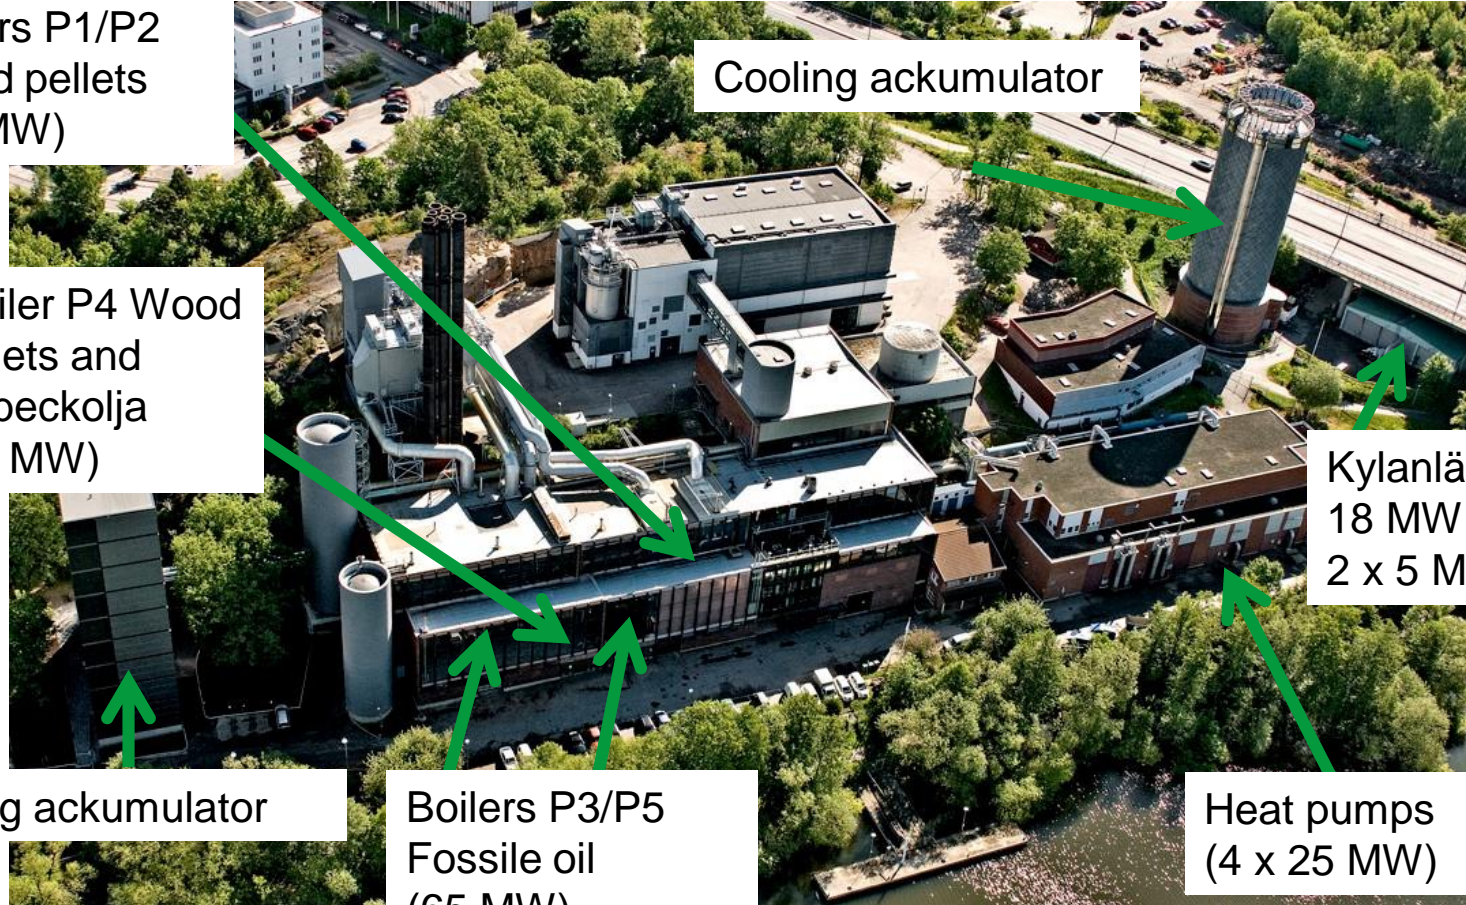

Heating ackumulator

Boilers P3/P5
Fossil oil
(65 MW)

Cooling ackumulator

Kylanläggning
18 MW Spillkyla VVX
2 x 5 MW Kylmaskiner

Heat pumps
(4 x 25 MW)

Our heating and cooling in smart cycles – the foundation for sustainable cities
